RAM'S NEW HYDRAULIC CLUTCH RELEASE BEARING KIT FOR GM'S 2010 CAMARO

Product Features:

- Developed for GM's 2010 Camaro
- Equipped with a spacer, its principal benefit is adjustability, allowing for easy set-up height to be obtained with most aftermarket clutch systems
- Delivers faster action, both on and off the clutch pedal, than its OEM counterpart, a further benefit to the racer
- Provides increased travel length over stock bearing systems
- Outfitted with all the necessary fittings and adapters and includes a quick-connect fitting to the factory master cylinder
- Compatible with all RAM clutch systems and with most aftermarket units, with proper setup.

Part # 78180

Price: MSRP is \$429.99

Availability: If contacted before noon, Ram ships same day, otherwise orders usually ship within twenty-four hours.

There is a sense of occasion this Friday evening as RAM Clutches is featured on the acclaimed television program *How It's Made*.

The segment, devoted to the manufacture of drag racing clutches, will be aired on Discovery's Science Channel in the USA on **Friday, April 2nd 2010 at 9:30pm EST.**

If you feel inclined and you have the time, please double-check the airing date in case there are changes.

Questions: RAM is aware that all your questions may not be addressed here. To that concern RAM has a wise and able team that can provide valuable, free information.
