

NEW PRODUCT RELEASE

RAM CLUTCHES KEVLAR PILOT BUSHINGS

RAM is now introducing a better pilot bushing for popular Ford and GM applications. It is made of Kevlar.

Advantages:

- Self-lubricating
- Offers low susceptibility to damage from heat
- Maintains dimensional stability
- Reduces wear significantly when compared to bronze bushings and, especially, needle-roller bearings.

These bushings are now available for small-block (including LS) and big-block Chevrolets using bronze bushings or needle-roller bearings. They also suit Ford applications using needle roller-bearings, such as late model 5.0L and 4.6L engines. Use Ram part number BU656K for Chevrolet engines and for Ford, part number BA50MK.

Availability: If contacted before noon, Ram ships same day, otherwise orders usually ship within twenty-four hours.

Questions: RAM is aware that all your questions about may not be addressed here. To that concern RAM has a wise and able team that can provide valuable, free information.
